I am well versed in production and post processes with a 44 year career in the industry in a variety of positions. I've produced several features and acted in a line producer and post producer capacity on a number of projects over the past ten years. My engineering background provides valuable insight towards implementing the best possible post production workflows and I hold a thorough working knowledge of current and past production and post-production techniques. I have served as a consultant in the development of editorial systems and helped to engineer and build facilities. I own a regional production company and am actively creating and distributing feature films and other products.
